## Chapter 1

# Economic developments

The Central Statistical Office estimates that in Q3 2017 the gross domestic product (GDP) has increased by 4.9% y/y versus 4.0% y/y in Q2 2017 and 2.6% in the previous year. Economic growth resulted from positive dynamics of domestic demand and positive trade in goods balance.

Domestic demand increased by 5.5 versus 3.9% y/y in Q2 2017. Impact of this item on the GDP growth stood at 3.8 percentage points. Individual consumption increased by 4.8% y/y and public consumption went up by 1.9% y/y. Consequently, total consumption contributed to 3.2 percentage point increase in the GDP growth.

In Q3 2017 gross expenditure against fixed assets increased by 3.3% versus 0.9% increase in Q1 2017. This item had only slight influence on the GDP growth (0.6 percentage points). Investment rate measured as gross expenditure on fixed assets against gross national demand stood at 17.1% versus 17.4% last year.

Increase in tangible current assets exercised a neutral impact on GDP growth

Changes in exports and imports dynamics stood at 7.6% y/y and 5.7% y/y respectively. In consequence impact of negative trade in goods on the GDP stood at 1.1 percentage points.

Gross added value in the national economy increased by 4.8% y/y. In industry it stood at 5.4% y/y. Gross added value in non-industrial sections increased in construction by 19.5% y/y, transportation and storage by 10.0% y/y, trade and repair of motor vehicles<sup>A,1</sup> by 6.4% y/y, accomodation and catering<sup>A</sup> by 2.6% and information and communication by 2.5% y/y. Decrease in this catheogry was noted for finance and insurance, down by 2.9% y/y.

According to the Central Statistical Office (CSO) monthly data published in October 2017 the increase in industrial output amounted to 12.3% y/y – versus 4.1% y/y the month before. Adjusted for seasonal factors the overall industrial output increased by 9.7% y/y when compared with the corresponding month of the previous year.

Increase in output was registered in manufacturing (up by 14.0% y/y), gas, electricity and hot water supply<sup>A</sup> (2.0% y/y). Decrease was reported in mining (1.5% y/y).

Increase in industrial output, when compared with the corresponding period of the previous year, was reported for 32 (of 34) branches of industry<sup>2</sup> increase in sales was reported for machinery and equipment<sup>A</sup> (23.8% y/y), metal products<sup>A</sup> (19.3%), rubber and plastics (16.6% y/y), furniture (15.9% y/y), other non-metallic mineral products (14.9% y/y), motor vehicles, trailers and semi-trailers<sup>A</sup> (10.1% y/y) as well as food products (9.2% y/y).

<sup>1</sup> <sup>A</sup> signifies that the name used is an abbreviated version of the name listed in PKD 2007. The symbol had been used only on first appearance of the name

<sup>2</sup> Branches of manufacturing with average employment over 100 000 persons.

(1.9% y/y), other non-metallic mineral products (1.8% y/y) motor vehicles, trailers and semi-trailers<sup>A</sup> (0.5% y/y) as well as machinery and equipment (0.1% y/y). Decrease in prices was reported for rubber and plastics (0.6% y/y) as well as furniture (0.3% y/y).

In October 2017, construction and assembly production prices went up by 1.0% y/y versus 0.7% y/y the month before.

The CPI for September went up by 2.1% y/y versus 2.2% y/y increase the month before. Increase in prices was reported for food and non-alcoholic beverages (5.4% y/y), household maintenance and energy fees (2.6% y/y), healthcare (2.0% y/y), telecommunications (1.6% y/y), alcohol and tobacco (0.9% y/y) as well as transportation (0.4% y/y). Decrease in prices was reported in footwear and apparel (4.6% y/y).

In October 2017, the average employment rate in the enterprise sector stood at 6036 thousand – up by 4.4% (257 thousand) when compared with a year before. Increase in employment was reported for manufacturing (3.7% y/y). Decrease in employment was reported for gas electricity and hot water supply (1.4% y/y) as well as in mining (2.9% y/y).

In manufacturing an increase in average employment was reported in motor vehicles, trailers and semi-trailers (7.9% y/y), rubber and plastics (5.6% y/y), furniture (4.6% y/y), metal products (4.3% y/y), other mineral non-metallic products (3.8% y/y) as well as machinery and equipment (1.7% y/y) and food products (1.5% y/y).

In non-industrial sections an increase in employment was reported in administration and support sectionΔ (10.2% y/y), accommodation and cateringΔ (8.6% y/y), transportation and storage (7.0% y/y), information and communication (5.9% y/y) as well as trade and repair of motor vehicles (4.4% y/y) and construction (2.1% y/y).

The number of registered unemployed amounted to 1069.5 thousand, down by 238.5 thousand (18.2%) when compared with a year ago. The unemployment rate amounted to 6.6% versus 8.2% in the corresponding period of 2016.

Average monthly gross wages and salaries in the enterprise sector stood at PLN 4 574 and thus were 7.4% higher when compared to a year ago. Increase in wages and salaries was reported for manufacturing (7.8% y/y), gas electricity and hot water supply (8.6% y/y) as well as mining (6.6% y/y).

In manufacturing, an increase in average wages and salaries was reported in food products (10.3% y/y), machinery and equipment (9.3% y/y), rubber and plastics (9.1% y/y), furniture (8.5% y/y), metal products (7.3% y/y), motor vehicles, trailers and semi-trailers (6.9% y/y) as well as other non-metallic mineral products (6.3% y/y).

In non-industrial sections increase in wages and salaries was noted for administration and support section (9.1% y/y), construction (8.5% y/y), trade and repair of motor vehicles (8.2% y/y), accommodation and catering (7.8% y/y), transportation and storage (7.2% y/y), and information and communication (5.8% y/y).

In January-October 2017 revenues of the national budget stood at the level of PLN 295.0 billion, whereas its expenditure amounted to PLN 292.4 billion. Revenues were higher when compared to the corresponding period of the previous year by 9.8% and expenditure were lower by 0.3% and accounted for 90.7% and 76.0% of budget assumptions for 2017 respectively.

Central budget surplus stood at PLN 2.7 billion versus the assumed annual deficit of PLN 59.3 billion.

Inflows from indirect taxes amounted to PLN 192.1 billion and increased when compared with last year by 15.9%. Inflows from personal income tax increased to PLN 42.3 billion i.e. 8.5%. Inflows from corporate income tax stood at PLN 24.7 billion, up by 12.4% when compared with the previous year.

## Chapter 2

# Monetary developments

The Monetary Policy Council during its session on 3-4 October 2017 left basic NBP interest rates at following levels:

- reference rate – 1.50%,
- lombard rate – 2.50%,
- deposit rate – 0.50%,
- rediscount rate – 1.75%.

During the October reserve maintenance period<sup>4</sup> the POLONIA index deviation against the reference rate equaled to 20 basis points versus 12 basis points in the previous month. Short-term liquidity of the banking sector measured as a total of the NBP main operations, fine-tuning operations and standing facilities stood at PLN 77.5 billion, up by PLN 8.0 billion when compared with the previous reserve maintenance period.

Average open market operations amounted to PLN 75.9 billion (versus PLN 68.5 billion in the previous month) of which main operations stood at PLN 74.7 billion. Throughout the reserve maintenance period the average daily recourse to the deposit facility totaled PLN 1.6 billion (versus PLN 1 billion in the previous period).

In October 2017 average interest rates on zloty denominated loans to non-financial corporations<sup>5</sup> decreased from 3.8% to 3.7%. Interest rates on loans to sole proprietorships went down from 6.2% to 5.4%.

As regards zloty denominated loans to households interest rates for loans for consumption decreased from 7.7% to 7.8% and interest rates for loans for house purchases remained at 4.4%.

Interest rates on deposits of non-financial corporations went up from 1.3% to 1.2% and deposits of households remained at 1.5%.

In October 2017, the value of M3 increased by PLN 11.7 billion (0.9%) and stood at PLN 1 287.7 billion. Its annual growth rate went up by 0.3 percentage points and stood at 5.7% y/y. Influence of non-transactional factors (changes in exchange rate of the zloty against major

---

<sup>4</sup> Reserve maintenance period in question refers to the period from 2.10.2017 to 30.10.2017.

<sup>5</sup> Interest rates on loans and deposits refer to new business. For further information regarding the calculation of average interest rates on loans and deposits refer to the NBP website at [http://www.nbp.pl/homen.aspx?f=en/statystyka/oproc/mir\\_new/mir\\_new.html](http://www.nbp.pl/homen.aspx?f=en/statystyka/oproc/mir_new/mir_new.html). Starting from data for July 2016 the MIR reporting population has been extended from 16 to 25 banks.

Chart 2.1 Interest rates on the inter – bank versus basic interest rates of the NBP

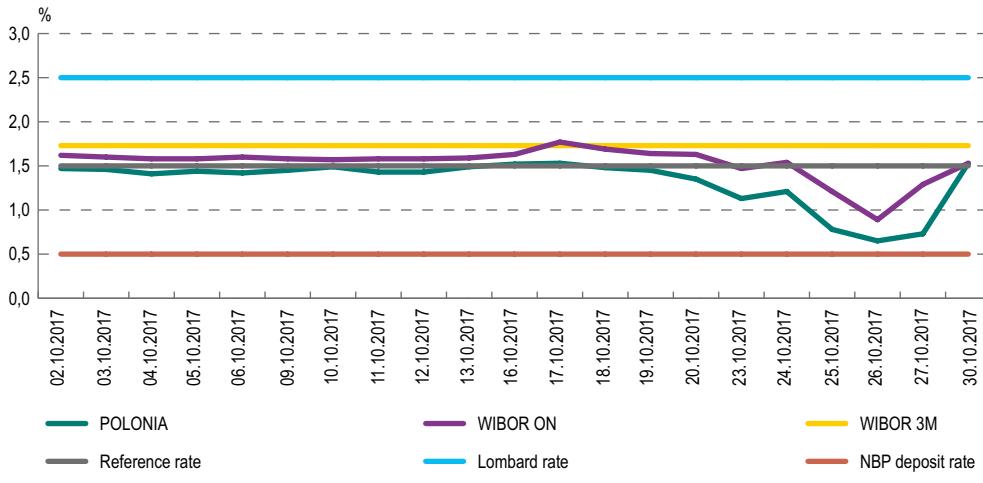

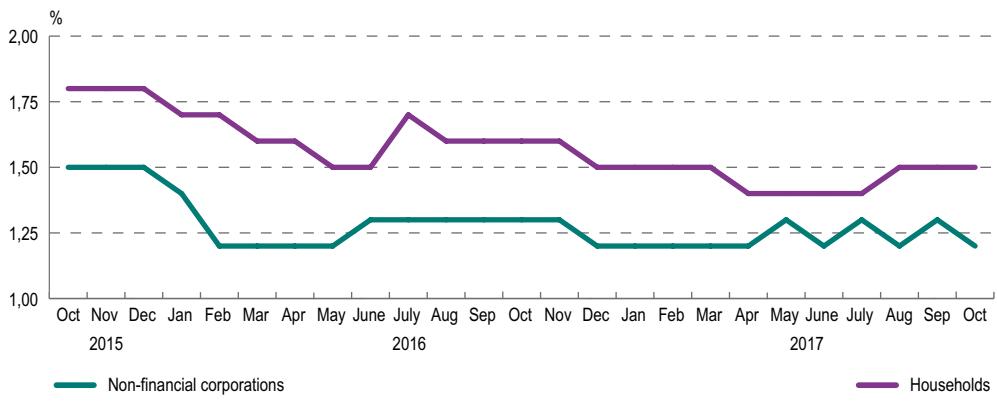

Chart 2.2 Average MFI deposit interest rates on new business, PLN denominated

currencies mostly) led towards increase in money supply. The value of monthly transactions increased the value of M3 by PLN 13.0 billion<sup>6</sup>.

Components of the M1 aggregate with high liquidity increased by 0.8 percentage points and stood at 12.9% y/y. Other components of broad money went up by 0.7 percentage points and stood at minus 6.2% y/y.

<sup>6</sup> Monthly transactions are calculated as the difference in outstanding amounts between two subsequent reporting months adjusted for changes arising from non-transactions, i.e. exchange rate changes, revaluations, reclassifications and other adjustments such as errors in data reported by banks. The methodology for the compilation of transactions is described in [http://www.nbp.pl/en/statystyka/m3/Statystyka-transakcji-metodyka\\_EN.pdf](http://www.nbp.pl/en/statystyka/m3/Statystyka-transakcji-metodyka_EN.pdf).

Chart 2.3 Average MFI loan interest rates on new business, PLN denominated

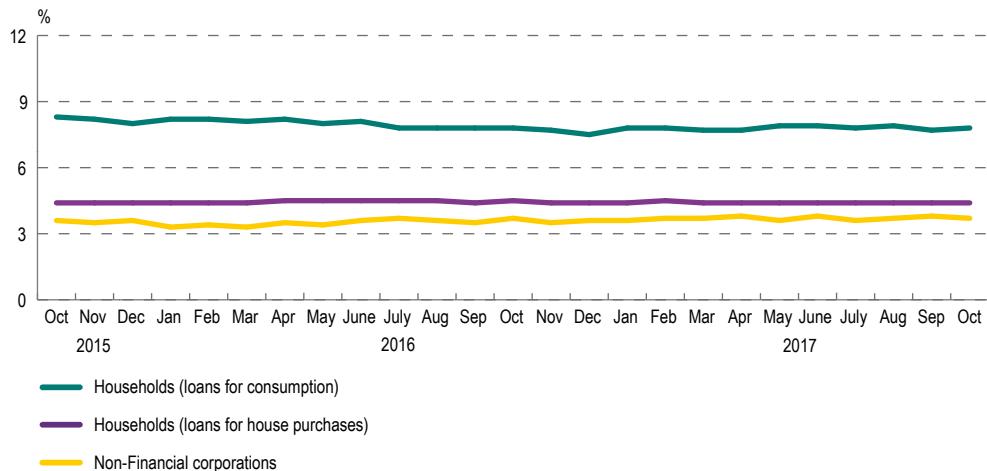

Chart 2.4 Share of currency in circulation and overnight deposits of domestic residents in M3, M1 and 'M3-M1' growth (corresponding period of the previous year = 100)

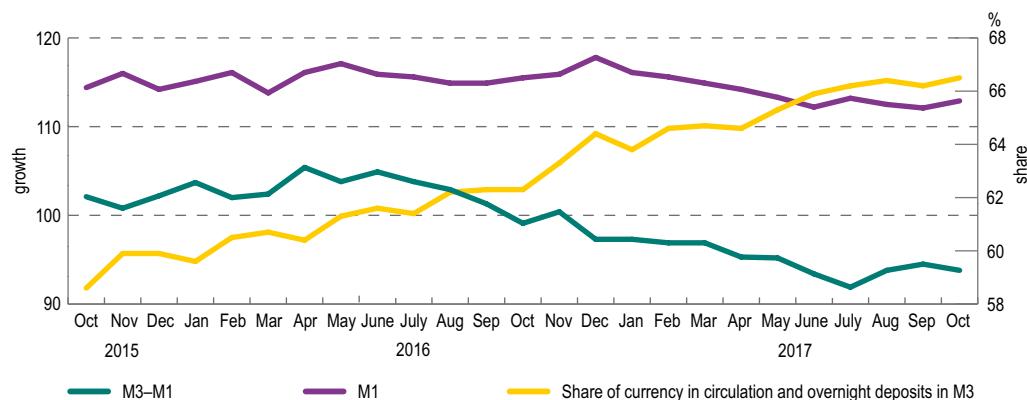

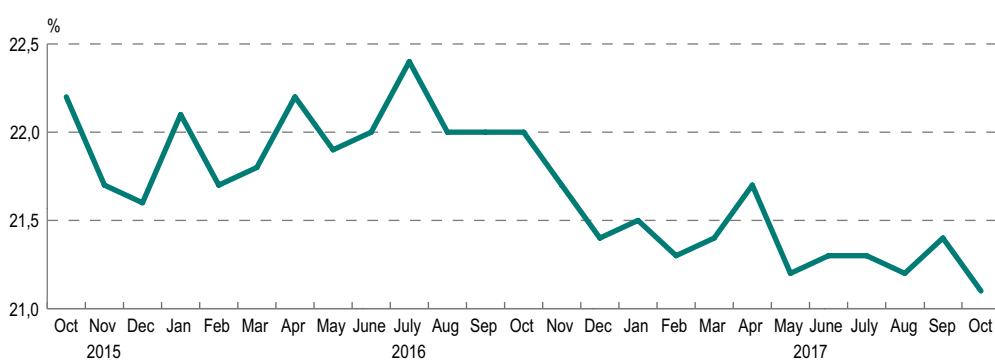

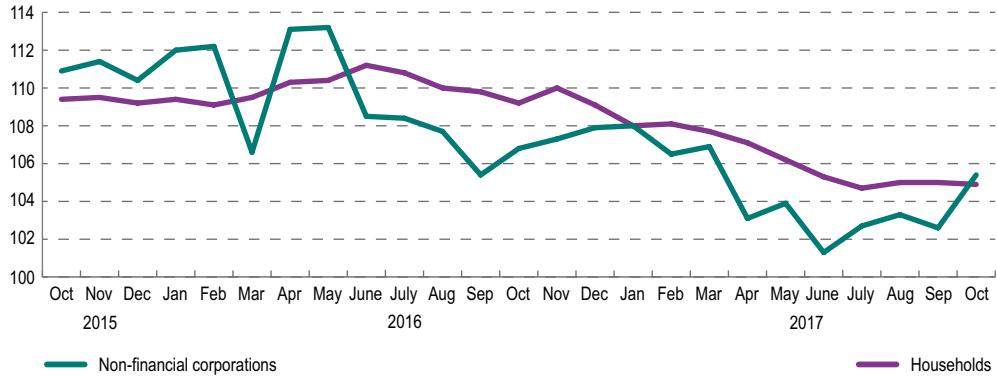

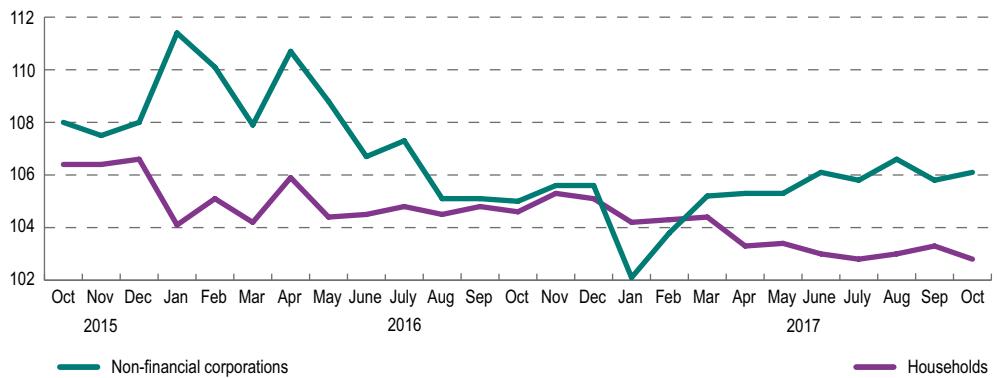

Chart 2.5 Share of currency in circulation in M1

**Chart 2.6 Deposits and other liabilities of MFIs to non-financial corporations and households included in M3 (corresponding period of the previous year = 100)**

**Chart 2.7 MFI loans and other claims on non-financial corporations and households (corresponding period of the previous year = 100)**

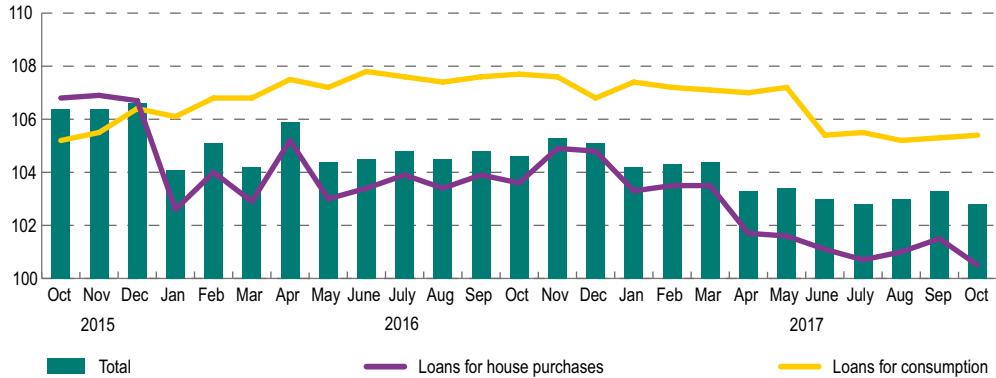

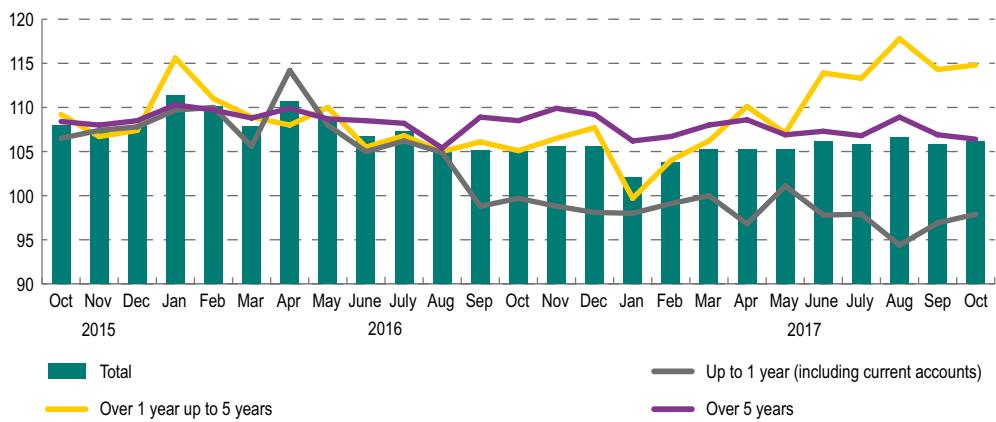

In October 2017 currency in circulation remained at PLN 180.9 billion. Its annual growth rate decreased by 0.9 percentage points and amounted to 8.4% y/y.

M3 liquidity measured as the share of currency in circulation and overnight deposits in M3 went up by 0.4 percentage points and stood at 66.5%.

M1 liquidity measured as the share of currency in circulation in M1 decreased by 0.3 percentage points and stood at 21.1%.

Deposits and other liabilities included in M3 increased in October 2017 by 11.1 billion (1.0%) and reached the level of PLN 1 096.5 billion. Monthly transactions increased by 0.4 percentage points and stood at 5.2% y/y. Increase was reported in deposits of non-financial corporations (PLN 9.5 billion; 3.8%), households (PLN 2.8 billion; 0.4%) as well as non-profit institutions serving households (PLN 0.3 billion, 1.0%). Decrease was reported in local government (PLN 0.7 billion; 1.9%), other financial institutions (0.6%; 1.2%) and social security funds (PLN 0.1 billion, 1.9%)

Chart 2.8 Bank loans to households (corresponding period of the previous year = 100)

Chart 2.9 Bank loans to non-financial corporations  
(corresponding period of the previous year = 100)

Among counterparts to M3, increase credit to central government net (PLN 11.7 billion i.e. 5.4%) as well as external assets net (PLN 9.8 billion i.e. 4.3%) contributed to an increase in money supply. Increase in long term loans (PLN 7.0 billion, 1.8%)<sup>7</sup> as well as decrease in MFI credit to domestic sectors<sup>8</sup> (PLN 0.4 billion i.e. 0.04%) had an adverse impact on money supply.

MFI<sup>9</sup> credit to non-financial corporations increased by PLN 1.9 billion (0.6%) and reached PLN 335.8 billion. The value of monthly transactions amounted to PLN 2.9 billion. The annual growth rate in credit to non-financial corporations went up by 0.3 percentage points and stood at 6.1%. Loans with maturity from 1 up to 5 years went up by 14.8% and loans

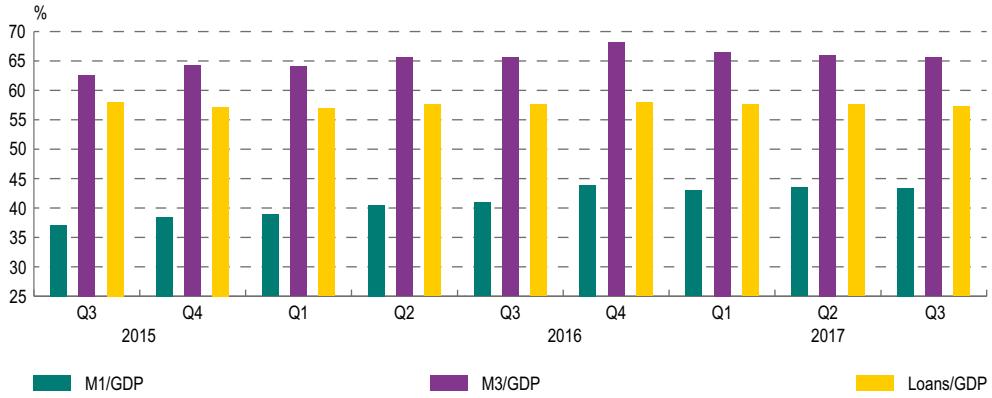

<sup>7</sup> Long term loans comprise deposits and other liabilities with maturity over 2 years MFI securities issued with maturity over 2 years as well as capital and reserves.

<sup>8</sup> The category "credit" comprises loans, holdings of debt and equity securities, and other receivables, e.g. debt purchased, guarantees and warrantees.

Domestic sectors include non-monetary financial institutions, non-financial corporations, non-profit institutions serving households, local government and social security funds.

<sup>9</sup> Except credit against securities issued.

Chart 2.10 Share of monetary aggregates and MFI loans and other claims on other domestic residents in GDP

with maturity over 5 years increased by 6.4%. Loans with maturity up to one year (including overdrafts) decreased by 2.1%.

MFI credit to households increased in October 2017 by PLN 1.0 billion i.e. 0.1% and stood at PLN 676.8 billion. Monthly transactions amounted to PLN 2.8 billion. Annual growth of credit to households increased by 0.5 percentage points and stood at 2.8%. Growth of housing loans stood at 0.5% y/y. The growth in consumer loans stood at 5.4% y/y.

According to data for Q3 2017 the M1 to GDP ratio decreased by 0.5 percentage points and stood at 43.4% and the M3 to GDP ratio went down by 0.4 percentage points and stood at 57.3%.

In October, the nominal exchange rate of the zloty<sup>10</sup> appreciated by 1.4% against EUR, 2.7% against CHF, 1.2% against GBP and depreciated by 0.03 against USD.

<sup>10</sup> Exchange rate changes between end-September 2017 and end-October 2017 are calculated as the difference between end-month average exchange rates quoted by NBP.

## Chapter 3

# Balance of payments in Poland in October 2017

Components of monthly bop are estimated based on monthly and quarterly information reported by residents involved in transactions with non-residents, public statistics surveys as well as administrative data sources.

This version of bop is preliminary and may be subject to further revisions.

### 3.1 The current and capital account

Current account in October 2017 was positive and amounted to PLN 2.5 billion. It was influenced by positive balance of services (PLN 6.9 billion) and trade in goods (PLN 2.6 billion) as well as negative balance of primary income (PLN 6.5 billion) and secondary income (PLN 0.5 billion). In the corresponding period of 2016 current account balance was negative and stood at PLN 0.1 billion. Total balance of current and capital account was positive and amounted to PLN 5.0 billion.

In October 2017 exports of goods was estimated at PLN 76.4 billion, up by PLN 9.6 billion, i.e. 14.3% when compared with the corresponding period of 2016. Similarly to the previous month, the highest increase was recorded in the following categories: food, products of chemical industry (mostly medicines) and furniture. Value of imports when compared with September was higher by PLN 7.8 billion i.e. 11.8% and stood at PLN 73.9 billion. The highest increase in imports was noted in fuels and raw materials. Positive trade in goods balance stood at PLN 2.6 billion. In October 2016 it was also positive and amounted to PLN 0.8 billion.

Exports of services amounted to PLN 19.8 billion, up by PLN 2.9 billion, i.e. 17.5% when compared with October 2016. Imports stood at PLN 12.9 billion which means an increase by PLN 1.2 billion, i.e. 10.5%. Positive balance of services stood at PLN 6.9 billion and was influenced by positive balance on other services (PLN 2.8 billion), transportation (PLN 2.4 billion) and travel (PLN 1.7 billion).

In October 2017, the primary income balance was negative and amounted to PLN 6.5 billion. In the corresponding period of 2016 this balance was also negative and stood at PLN 6.0 billion. Negative balance of primary income resulted mostly from negative balance on investment income (PLN 5.9 billion). Foreign direct investors' income on their capital involvement in Polish companies amounted to PLN 5.3 billion (of which: dividends PLN 1.0 billion, reinvested earnings amounting to PLN 3.5 billion and interest on debt instruments PLN 0.8 billion). Negative balance of investment income was also influenced by non-residents income from portfolio investment (PLN 1.2 billion) as well as interest due to other debt instruments reported in other investment (PLN 0.7 billion), mostly due to loans received by Polish entities.

Inflow of EU funds stood at PLN 2.8 billion of which PLN 2.5 billion affected the capital account under European Regional Development Fund and Cohesion Fund. The balance of transfers with the EU (membership premium in the amount of PLN 1.5 billion included) was positive and stood at PLN 1.4 billion.

## 3.2 Financial account

### 3.2.1 Non-resident investment in Poland (liabilities)

In October 2017 non-residents' investment in Poland went up by PLN 5.8 billion.

Non-residents' direct investment increased by PLN 6.7 billion. This balance was mainly influenced by reinvestment of earnings standing at PLN 3.5 billion and increase of residents' liabilities against debt instruments in the amount of PLN 2.8 billion. Increase residents' liabilities against equity stood at PLN 0.4 billion.

Balance on portfolio investment was negative and stood at PLN 0.6 billion. Non-residents investment in debt securities amounted to PLN 2.0 billion. During the discussed period non-residents withdrawn PLN 5.3 billion net from investments in Treasury bonds nominated in Polish zloty. This decrease resulted from the advantage of buy-outs over new issues of Treasury bonds. At the same time non-residents invested PLN 3.6 billion in bonds issued by the banking system, increasing the value of their portfolio by PLN 3.6 billion. Non-resident investment in equity securities stood at PLN 1.4 billion.

Balance of other non-resident investment in Poland decreased by PLN 0.3 billion. The banking sector decreased its liabilities by PLN 0.7 billion (mostly due to long term loans). Liabilities of NBP went down by PLN 0.6 billion (mostly due to repo transactions). Liabilities of other sectors against other investment net increased by PLN 1.2 billion (loans received mainly).

### 3.2.2 Polish investment abroad (assets)

Balance on Polish investment abroad was positive (increase in assets) and stood at PLN 8.2 billion.

Direct investment assets recorded an increase (outflow of capital) by PLN 1.1 billion, mainly in debt instruments.

Residents increased their external assets under portfolio investment by PLN 0.7 billion mostly in debt securities (PLN 1.0 billion).

Balance on other investment was positive and stood at PLN 5.5 billion. This balance was influenced by increase in external assets of the banking sector which stood at PLN 4.9 billion, mostly mainly in the form of currency and deposits of Polish banks in banks abroad (PLN 3.2 billion). Increase was reported in the assets of other sectors, up by PLN 1.2 billion mostly due to deposits placed in banks abroad and trade credits extended.

<sup>a</sup> Preliminary data.

<sup>b</sup> Cumulated data presented as 12-month moving data.

NBP's own transactions and NBP client transactions resulted in an increase in the value of reserve assets by PLN 1.3 billion. Official reserve assets at the end of October 2017 amounted to PLN 404.2 billion.

## Chapter 4

# **Key decisions of the Monetary Policy Council**

Resolution of the Monetary Policy Council No 4/2017 of 30 May 2017 on approving the NBP's Activity Report in 2016.

## Chapter 5

# Statistical annex

## 5.1 Tables

**Table 5.1.1** Basic statistical data

Period	Industrial output			Construction output			Consumer price index			Producer price index	
	current prices	constant prices		current prices	constant prices		the same month previous year = 100	previous month = 100	December previous year = 100	the same month previous year = 100	previous month = 100
		the same month previous year = 100	previous month = 100		the same month previous year = 100	previous month = 100

## 5.4 Methodological notes

**Table 5.1.1 Basic statistical data**

Information contained in Table 5.1.1 is derived from the “Statistical Bulletin” of the Central Statistical Office (GUS). Definitions of the categories presented in the Table can be found in the GUS publications.

1. Data presented in pts. 1, 2, 6, 7, 10 and 12 comprise national economy entities regardless of their ownership type, i.e. public sector entities (state-owned entities, units of local government and mixed ownership, where public sector entities prevail) and private sector entities. The private sector includes units of private domestic ownership (among others: companies, cooperatives, natural persons conducting economic activities, social organizations, associations, foundations), private foreign ownership ( among others: foreign enterprises branches, foreign representatives, partnerships with exclusive foreign capital share) and “mixed” ownership with a private sector unit capital majority or lack of sectors majority in unit capital.
2. The corporate sector comprises entities, which conduct their economic activities in the fields of: forestry, including the provision of services; marine fishing; mining and quarrying, manufacturing; electricity, water, gas and conditioned air production and supply; sanitation management and other sanitation services; construction; ; repair of motor vehicles, motorcycles; transport, storage and communication; wholesale and retail trade; hotels and restaurants; information and communication; real estate market services; legal services; accounting and tax services for head offices, management solutions; architecture and engineering services; technological research and analysis; advertising; market and public opinion polls; other professions, technical or academic activity; administration and support; recreational, cultural, sporting and other services computer repair and maintenance for individual clients; other business activities
3. According to the Polish Statistical Classification of Economic Activities (PKD 2007), the notion of “industry” applies to the following sections: “mining and quarrying”, “manufacturing” and “electricity, gas and water production and supply” as well as water supply sanitation management and other sanitation services.
4. Data on the sold production of industry (pt. 1), and the construction and assembly production (pt. 2) refer to:
  - economic entities with of more than 9 employees.
5. Data on the value of the sold production of industry (pt. 1) and the construction and assembly production (pt. 2) are disclosed net without the due value added tax (VAT) and the excise tax, while they include subsidies for specific purposes to products and services in the so-called base prices.
6. Construction and assembly production data (pt. 2) refer to works performed in Poland on commission (i.e. for third-party) and directly (i.e. without subcontractors) by the business entities of the construction sector, i.e. classified under “construction” according to the PKD 2007.

7. Information on the sold production of industry (pt. 1) and the construction assembly production (pt. 2) are disclosed without seasonal adjustments.
8. Data on employed persons include persons employed on a full and part-time basis in the main place of work. Employed persons include: persons employed on the basis of a labour contract; owners and co-owners of units engaged in economic activities including contributing family members; outworkers; agents and persons employed by agents; members of agricultural production co-operatives. Data presented in the Bulletin do not include private farmers or employees of budget entities conducting activity within the scope of national defence and public safety.
9. Unemployment rate (pt. 9) is calculated as a percentage share of the unemployed in the total of employed and unemployed persons over 15 years of age.
10. Revenues from privatisation do not constitute the current revenues of the state budget; instead they finance the budget deficit (pt. 11).
11. Data on financial results of enterprises (pt. 12) pertain to business units that keep accounting books (except for the following units, classified according to PKD 2007 under "agriculture, forestry hunting and fishing" and Financial and insurance services") with more than 49 employees.

**Table 5.1.2 Financial market – basic information**

Information comprised in Table 5.1.2 has been derived from the National Bank of Poland (save for the data in pt. 6, supplied by the Warsaw Stock Exchange).

1. Interest rates in Table 2 are presented on an annual basis at the level which was binding on the last day of a given month. The average monthly interest rate has been given only for the weighted average yield on purchased T-bills or the NBP money-market bills.
2. As from January 1 2011, the NBP no longer sets the central bank discount rate.
3. Total reserve requirements (pt. 2, col. 12) pertain to the volumes declared by banks and binding on the last day of the month. Since 28 February 2002, the total reserve requirements are held exclusively on the NBP accounts.
4. Information on treasury bill tenders (pt. 3, except for the stocks of bills in circulation at the end of the month – col. 18) comprises data from tenders conducted within one month. The average yield on bills purchased is weighted by the share of the sales of bills with different maturities in the total value of bills purchased. The stock of bills in circulation at month end has been determined on the basis of the agreed maturity, calculated from the day after the tender which resulted in the sale of the bill. The above stock does not include bills in circulation which do not stem from tenders.
5. Information on tenders for the NBP money-market bills (pt. 4, except for the stock of bills in circulation at month end – col. 24) comprises data from tenders conducted within one

month. The average yield on bills purchased is weighted by the share of the sales of bills with different maturities in the total value of bills purchased.

6. The below presentation of indices comprises precise data involving the situation of the largest (WIG 20), medium (mWIG40) and small stock companies (sWIG80)
  - WIG20 index has been calculated since April 16, 1994 based on the value of portfolio with shares in 20 major and most liquid companies in the main stock market. The initial value of WIG20 index was 1000 points. It is a price index and thus when it is calculated it accounts only for prices of underlying shares whereas dividend income is excluded. The WIG20 index may not include more than 5 companies from a single exchange sector.
  - mWIG40 index is successor of MIDWIG index and has been calculated since December 31, 1997 and comprises 40 medium size companies listed at WSE. The initial value of index was 1000 points. mWIG40 is a price index and thus when it is calculated it accounts only for prices of underlying shares whereas dividend income is excluded. The mWIG40 index excludes WIG20 and sWIG80 index participants and foreign companies listed at WSE and other markets with the market capitalization at the ranking date above € 1 billion.
  - sWIG80 index is successor of WIRR index that has been calculated since December 31, 1994 and comprised 1% of smaller companies listed at WSE. The initial value of index was 1000 points. sWIG80 is a price index and thus when it is calculated it accounts only for prices of underlying shares whereas dividend income is excluded. The sWIG80 index excludes WIG20 and mWIG40 index participants and foreign companies listed at WSE and other markets with the market capitalization at the ranking date above € 100 M.
7. The indices comprise companies from all the quotation markets.
8. Capitalization refers only to domestic companies.
9. The P/E ratio shows the relation of the market price to net earnings and is calculated as a quotient of the total market value of companies at month end to their aggregated profits and losses generated within the last 4 quarters, for which financial data are available.
10. The turnover ratio shows the relation between the value of sold shares to the average value of shares quoted in a given month.
11. The monthly turnover value and the turnover ratio comprise the continuous quotation and fixing.

**Table 5.1.3 PLN/USD and PLN/EUR daily exchange rates**

The information has been based on the data of Narodowy Bank Polski.

1. NBP average exchange rate is the official exchange rate used for statistical and accounting purposes.

2. The average PLN/USD and PLN/EUR exchange rates and the USD/EUR ratio were calculated as the arithmetic average of NBP average exchange rates for a month (based on daily exchange rates).

#### 5.4.1 Monetary statistics

On 23 October 2017 NBP published monetary aggregates for the reference periods June–September 2017 compiled based on the data collected in the new monetary statistics reporting system. For this release of the Information Bulletin data for time series from June 2017 were derived from the new reporting scheme. Whereas time series up to May 2017 were derived from the former reporting scheme.

The comparison of major monetary aggregates for the months of June, July and August 2017 compiled based on the data transmitted in parallel in both systems revealed minor differences (for more information please refer to:

[http://www.nbp.pl/en/aktualnosci/2017/m3-09-17\\_en-announcement.pdf](http://www.nbp.pl/en/aktualnosci/2017/m3-09-17_en-announcement.pdf)

Narodowy Bank Polski releases monetary statistics based on data received from monetary financial institutions (MFI), which comprise Narodowy Bank Polski, banks operating in Poland and branches of foreign credit institutions and foreign banks, credit unions and money market funds<sup>1</sup>.

#### Sectoral classification

- **financial sector** – comprises the following sub-sectors:
  - monetary financial institutions<sup>2</sup> (including the central bank and other monetary financial institutions). In Poland, the concept of other monetary financial institutions applies to banks, credit unions and money market funds (MMFs)<sup>1</sup>
  - non-MMF investment funds;
  - insurance corporations;
  - pension funds;
  - other financial intermediaries (including, financial leasing companies, factoring companies, brokerage offices, and financial companies created for securitization of assets);
  - financial auxiliaries and captive financial institutions and money lenders (including bureaus de change, stock exchanges, hire purchase institutions);
- **non-financial sector** – comprises the following sub-sectors:
  - non-financial corporations (including state-owned corporations and private corporations and co-operatives);

<sup>1</sup> Starting from January 2012 the list of Polish monetary financial institutions (MFIs) does not include money market funds (MMFs), as no investment fund meets the criteria of MMF definition as set forth in the regulation of the European Central Bank No. 1071/2013 of 24 September 2013 concerning the balance sheet of the monetary financial institutions sector (ECB/2013/33).

<sup>2</sup> In accordance with the ECB definition, monetary financial institutions (MFIs) comprise financial institutions whose business is to receive deposits or close substitutes for deposits from entities other than MFIs and, for their own account, to grant credits or to make investments in securities.

- individual entrepreneurs<sup>3</sup>
- farmers;
- individuals;
- non-profit institutions serving households.

In the publications of Narodowy Bank Polski, claims and liabilities of MFIs on/to the non-financial sector are presented in accordance with the EU standards, i.e. sub-divided into three sectors:

- *households* – comprising:
  - individuals;
  - farmers;
  - individual entrepreneurs 3;
- *non-financial corporations* – comprising state-owned corporations and private corporations and co-operatives (including: individual entrepreneurs with more than 9 employees);
- *non-profit institutions serving households*: (separate legal entities, which serve households. Their principal resources, apart from those derived from occasional sales, are derived from voluntary contributions in cash or in kind from households, from payments made by general governments and from property income);
  - general government- comprises the following sub-sectors:
  - central government (including public governing bodies, government administration bodies, state control and law protection bodies, courts and tribunals, public universities, state institutions of culture etc.);
  - government (including, among others, local administrative offices at regional level, local parliaments, public elementary schools administered by local government units, institutions of culture financed by local governments, welfare institutions, etc.);
  - social security funds (comprise the Social Insurance Institution and the Agricultural Social Insurance Fund and the funds they manage, and the national healthcare Fund and its branches).

**Table 5.1.4 Average MFI interest rates on outstanding amounts, PLN denominated**

Data on zloty denominated businesses refer to all businesses at the end of the reporting month, these concluded prior to the reporting month and still binding as well as new businesses. This interest rate is a quotient of interest on average zloty denominated business by average volume of businesses per reporting month, commissions and other charges excluded.

The interest rate is calculated based on data received from the following banks (25):

1. Powszechna Kasa Oszczędności Bank Polski SA
2. Bank Handlowy w Warszawie SA

---

<sup>3</sup> Natural persons conducting business activities on their own account, with a maximum of 9 employees.

3. ING Bank Śląski SA
4. Bank BPH SA
5. Bank Zachodni WBK SA
6. mBank SA
7. Bank Millennium SA
8. Bank Polska Kasa Opieki SA
9. Euro Bank SA
10. Bank Ochrony Środowiska SA
11. Raiffeisen Bank Polska SA
12. Deutsche Bank Polska SA
13. Bank Polskiej Spółdzielczości SA
14. Credit Agricole Bank Polska SA
15. Idea Bank SA
16. Bank BGŻ BNP Paribas SA
17. Santander Consumer Bank SA
18. mBank Hipoteczny SA
19. Getin Noble Bank SA
20. Alior Bank SA
21. Polski Bank Spółdzielczy w Ciechanowie
22. Krakowski Bank Spółdzielczy
23. Podkarpacki Bank Spółdzielczy
24. Wielkopolski Bank Spółdzielczy
25. Bank Spółdzielczy w Brodnicy

At the end-December 2016, the above banks held 86% of deposits of residents and 85% of credit to households and non-financial corporations. From December 2014 onwards, new methodology for calculating average weighted interest has been applied. New method

involves using data on reporting agent's homogenous groups (layers). For more information please refer to [http://www.nbp.pl/en/statystyka/oproc/mir\\_new/manual\\_mir.pdf](http://www.nbp.pl/en/statystyka/oproc/mir_new/manual_mir.pdf)

**Table 5.1.5 Average MFI interest rates on new and renegotiated business, PLN denominated**

Information refers to agreements carried out in a given reporting month. Renegotiated existing agreements shall be deemed new businesses.

Interest rates in the statistics on new businesses differ from those in Table 5.1.4. The formula is applied to statistical information on new businesses, also known as *Narrowly Defined Effective Rate* (NDER). The concept of *Narrowly Defined Effective Rate* was coined as an opposite to widely understood effective interest rate or *Real Interest Rate* (RIR). The NDER included, the new business statistics provides RIR for the second category of consumer and house purchase loans. As opposed to the NDER, which covers for interest costs of capital the real interest rate incorporates all charges paid by the borrower. These charges are most of all commissions (brokers included) but also compulsory loan insurance premiums against death or unemployment of the borrower.

For the table 5.1.5 data are collected from the same sample of banks as in case of table 5.1.4. Weighted average is calculated with the use of the same method.

**Table 5.1.6 Average MFI interest rates on new and renegotiated business, EUR denominated**

General rule of calculating interest rate are the same as for Table 5.1.4 (see star-marked lines) and Table 5.1.5. The Table 5.1.4 and 5.1.5 sample of banks applies as well.

#### **General comments on tables 5.1.8, -5.1.11**

1. The figures refer to the end of each reporting month and have been derived from balance sheets received from the banks and from the balance sheet of Narodowy Bank Polski and credit unions and money market funds<sup>4</sup>.
2. The presentation is structured in accordance with the ECB standards.
3. Assets in Tables 5.1.8, 5.1.9, 5.1.10 and 5.1.11 are shown gross of provisions, accumulated depreciation (except for debt securities presented at the carrying amount).

**Table 5.1.8 Balance sheet of Narodowy Bank Polski – assets and liabilities**

1. The item **loans and other claims on domestic residents** (assets col. 1) comprises receivables from granted loans granted, including rediscount, lombard, refinancing

---

<sup>4</sup> See footnote 1.

loans, loans granted from foreign credit facilities, open market operations, other loans and receivables from current and fixed term deposits placed.

2. **Debt securities issued by domestic residents** (assets col. 5) are securities held by Narodowy Bank Polski.
3. **Money market fund shares/units<sup>5</sup>** held by NBP.
4. **Equity and non-MMF investment fund shares or units issued by domestic residents** (assets col. 10) – at the moment in the case of NBP they include only fixed financial assets.
5. **External assets** (assets col. 13) include all assets of non-residents denominated in zloty and foreign currencies.
6. **Fixed assets** (assets col. 14) include total fixed assets except for financial fixed assets.
7. **Remaining assets** (assets col. 15) include interest due and not due on loans and other claims, deferred costs, inter-branch settlements and other assets excluding fixed assets.
8. **Deposits and other liabilities to domestic residents** (liabilities col. 2) represent liabilities on overnight deposits, deposits with agreed maturity, reserve requirements, auction deposits (open market operations), separated funds and other deposits.
9. **Debt securities issued** (liabilities col. 6) represent liabilities on NBP debt securities issued.
10. **Capital and reserves** (liabilities col. 7) in the case of NBP it comprises equity i.e. authorised capital, as well as reserve fund and provisions, which include specific provisions, accumulated depreciation and valuation allowances, profit/loss of the current year, loss incurred in previous years and valuation adjustments.
11. **External liabilities** (liabilities col. 8) include all liabilities of non-residents denominated in zloty and foreign currencies.
12. **Remaining liabilities** (liabilities col. 9) include interest from deposits and debt securities issued, deferred income, inter and intra-MFI settlements, other liabilities.

**Table 5.1.9 Aggregated balance sheet of other monetary financial institutions – assets and liabilities**

1. **Loans and other claims on domestic residents** (assets col. 2) loans granted, debt purchased, realised guarantees and sureties, other claims and claims on repurchase agreements.
2. **Debt securities issued by domestic residents** (assets col. 6) held by other monetary financial institutions.

<sup>5</sup> See footnote 1. Zero-sum in “Money market fund shares/units” results from change indicated in the footnote 1.

3. Money market funds shares/units<sup>6</sup> purchased by other MFIs (assets col. 10 ).
4. **Equity and non-MMF investment fund shares or units issued by domestic residents** (assets col. 11) include shares, investment fund participation units, investment certificates and fixed financial assets.
5. **External assets** (assets col. 14) include all assets of non-residents denominated in zloty and foreign currencies.
6. **Fixed assets** (assets col. 15) include total fixed assets except for financial fixed assets.
7. **Remaining assets** (assets col. 16) include vault cash i.e. cash and other cash equivalents held at other monetary financial institutions, as well as other claims and interest due and not due on loans and other claims, settlement accounts, claims on third parties, deferred income and expenditure, claims on financial derivatives positions, valuation adjustments, rights issue, other assets.
8. **Deposits and other liabilities to domestic residents** (liabilities col. 1) comprise overnight deposits, deposits with agreed maturity, blocked deposits, loans received, claims from cash collateral (classified to “with agreed maturity”), other liabilities and claims on repurchase agreements, subordinated loans except for those in the form of securities issued.
9. Money market funds shares/units issued by MMFs (liabilities col. 8).
10. **Debt securities issued** (liabilities col. 9) are liabilities on own debt securities issued by other monetary financial institutions and subordinated claims in the form of securities issued (purchased by residents and non-residents).
11. **Capital and reserves** (liabilities col. 10) comprise share paid-in capital, called-up capital unpaid, own shares, accumulated reserves, general risk provisions, reserve capital and retained earnings, supplementary funds provisions, including specific provisions, impairment allowances, mortgage notes reserves, specific provisions for off-balance liabilities, general risk provisions.
12. **External liabilities** (liabilities col. 11) include all liabilities of non-residents denominated in zloty and foreign currencies, except for debt securities issued.
13. **Remaining liabilities** (liabilities col. 12) include interest not due on deposits and other liabilities and interest on debt securities issued, suspense and transit items, liabilities against third parties, deferred income and expenditure, liabilities from financial derivatives positions, other liabilities, valuation adjustments.

---

<sup>6</sup> See footnote 1. Zero-sum in “Money market fund shares/units” results from change indicated in the footnote 1.

**Table 5.1.9.1 Loans and other claims on domestic residents – households and non-financial corporations**

Table 5.1.9.1 includes breakdown into two key sub-sectors (*households* – of which *individuals* – and *non-financial corporations*) grouped under “Other domestic residents” presented in col. 5 of Table 5.1.9 “Aggregated balance sheet of other monetary financial institutions”.

As at the end of December 2016, *households and non-financial corporations* amounted to 93.8% of the assets disclosed in col. 5 Table 5.1.9.

**Table 5.1.9.2 Deposits and other liabilities to domestic residents – households and non-financial corporations**

Table 5.1.9.2 includes breakdown into two key sub-sectors (*households* – of which *individuals* – and *non-financial corporations*) grouped under “Other domestic residents” presented in col. 4 of Table 5.1.9 “Aggregated balance sheet of other monetary financial institutions”.

As at the end of December 2016, *households and non-financial corporations* amounted to 89.4% of the liabilities disclosed in col. 4 Table 5.1.9.

**Table 5.1.10 Consolidated balance sheet of monetary financial institutions – assets and liabilities.**

1. Table 5.1.10 comprises consolidated balance sheet of monetary financial institutions.
2. In the assets and liabilities of the above-mentioned balance sheet, domestic inter-MFI operations have been netted out.
3. Remaining assets (assets col. 10) and currency in circulation (liabilities col. 1) were decreased by cash in vaults of other monetary financial institutions.

**Table 5.1.11 M3 and counterparts**

The comparison of major monetary aggregates for the months of June, July and August 2017 compiled based on the data transmitted in parallel in both systems is available on NBP website: [http://www.nbp.pl/en/aktualnosci/2017/m3-09-17\\_en-announcement.pdf](http://www.nbp.pl/en/aktualnosci/2017/m3-09-17_en-announcement.pdf)

Table 5.1.11 presents money supply M3 and its counterparts with a monthly frequency. Each category is broken down by instruments (loans, deposits and other liabilities, debt securities, etc.) and sectors of the economy. The scope and the presentation format are adjusted to standards used by the European Central Bank. Starting from March 2002, broad money M3 became basic analytical and publication category of money supply in Poland.

Table Monetary aggregates

Currency in circulation (excluding vault cash)	Overnight deposits and other liabilities	M1	Deposits and other liabilities with agreed maturity up to 2 years and blocked deposits	M2	Repurchase agreements	Debt securities issued with maturity up to 2 years	M3
	Households		Households				
	Non-monetary financial institutions		Non-monetary financial institutions				
	Non-financial corporations		Non-financial corporations				
	Non-profit institutions serving households		Non-profit institutions serving households				
	Local government		Local government				
	Social security funds		Social security funds				

Table 5.1.12 Reserve money and counterparts

The table presents reserve money of the central bank and its counterparts (official reserve assets, refinancing credit, open market operations, net credit to central government, other items net) with a monthly frequency.

#### Transactions statistics

Starting from end- September 2012, information on transactions and growth rates in key monetary categories has been included in M3 and counterparts – balance sheet format (including transaction data to be found at [www.nbp.pl/Statistics/Monetary and Financial Statistics/M3 and Counterparts/](http://www.nbp.pl/Statistics/Monetary and Financial Statistics/M3 and Counterparts/))

Transactions complement data on outstanding amounts with information on developments arising from financial transactions between monetary financial institutions (MIF) and other sectors in the economy. The approach to calculate transactions adopted by the National Bank of Poland (NBP) – consistent with the European Central Bank (ECB) methodology – allows for estimating the value of transactions when actual financial transactions are not reported directly by reporting institutions. The change in outstanding amounts between two subsequent reporting periods is affected by both financial transactions and developments arising from non-transactions. In order to present developments in a certain instrument that are the result of financial transactions only it is necessary – in line with the ECB methodology – to remove from the difference in two subsequent end-month outstanding amounts changes arising from non-transactions. Transaction data provide more accurate and analytically meaningful information on growth rates in monetary categories.

Information on operations other than transactions, i.e. adjustments, cover change in outstanding amounts resulting from:

**A revaluations:**

- revaluations of securities,
- write offs/write-downs of loans,

**B reclassifications and other adjustments, e.g. reporting errors and other statistical factors,****C exchange rate adjustments..****Calculation of monthly transactions and growth rate**

The starting point for calculating monthly growth rate is the computation of monthly changes arising from transactions ( $F_t^M$ ), calculated based on the difference in outstanding amounts between two subsequent reporting months ( $L_t - L_{t-1}$ ) – where  $L_t$  stands for the reporting month  $t$  and  $L_{t-1}$  for the previous reporting month  $t-1$ ), adjusted for monthly changes in non-transactions, i.e. reclassifications ( $C_t^M$ ), exchange rate changes ( $E_t^M$ ) and revaluations ( $V_t^M$ ):

$$F_t^M = (L_t - L_{t-1}) - C_t^M - E_t^M - V_t^M$$

Having calculated monthly transactions ( $F_t^M$ ) one can proceed to calculating monthly growth rate ( $a_t^M$ ) according to the following formula:

$$a_t^M = \frac{F_t^M}{L_{t-1}}$$

In order to obtain monthly growth rate in percentage terms the above formula is multiplied by 100.

The difference between the formula for the calculation of monthly growth rate adjusted for non-transactions and the formula for not adjusted growth rate  $s_t^M$  is in the value of  $CEV_t^M$  which is deducted from the difference in outstanding amounts between two subsequent reporting months ( $L_t - L_{t-1}$ ):

$$a_t^M = \frac{(L_t - L_{t-1}) - CEV_t^M}{L_{t-1}} * 100 \text{ versus } s_t^M = \frac{L_t - L_{t-1}}{L_{t-1}} * 100$$

Methodology for the compilation of transactions can be found at [www.nbp.pl/Statistics/Monetary and Financial Statistics/M3 and Counterparts/Methodology for the compilation of transactions.pdf](http://www.nbp.pl/Statistics/Monetary and Financial Statistics/M3 and Counterparts/Methodology for the compilation of transactions.pdf)

## 5.4.2 Statistical methods for the balance of payments in Poland( tables 5.1.13; 5.1.13.1; 5.1.13.2; 5.1.13.4; 5.1.13.5; 5.1.13.6; 5.1.13.7; 5.1.13.8; 5.1.14; 5.1.15; 5.1.16; 5.1.17)

### 5.4.2.1. Institutional aspects

#### Introduction

Narodowy Bank Polski (NBP) is responsible for compiling and publishing Poland's balance of payments (b.o.p.) and related statistics (e.g. the international investment position (i.i.p.), external debt, foreign direct investment (FDI) statistics, reserve assets).

#### Legislative provisions

Under the Act on Narodowy Bank Polski (NBP) of August 29, 1997, published in the Dziennik Ustaw (Journal of Laws) of 1997, No. 140, Item 938, NBP is obligated to compile the balance of payments and the international investment position statement and report thereon to Parliament and Council of Ministers.

The Act on Narodowy Bank Polski and the Prawo dewizowe (Foreign Exchange Act, published in the Journal of Law of 2002, No.141, Item 938), specify the reporting requirements. Under these acts and other legal regulations, NBP is authorized to request data for compiling balance of payments statistics. Other legal regulations are (1) the Regulation of the Minister of Finance dated October 23, 2009, published in the Journal of Law of 2009, No. 184, Item 1437, and (2) the Resolution of NBP's Management Board dated November 19, 2009, published in the Dziennik Urzędowy NBP (Official Journal of NBP) of 2009, No. 18.

In cases of non-compliance with legal requirements, sanctions can be imposed on non-reporting agents in the form of a fine that is regulated by the Penal and Fiscal Code.

#### External cooperation

NBP co-operates with domestic organizations (mainly with the Central Statistical Office) and foreign institutions.

The data necessary for the compilation of balance of payments are provided by business entities as well as state authorities.

The CSO forwards to NBP data on foreign trade and international trade in services, in line with methodology developed jointly by both institutions. Data on trade in goods and services from abroad are used by the CSO to calculate the rest of the world accounts in the national accounts statistics (GDP). The CSO also provides data on foreign travel (Poles and foreigners), migration statistics, which is used to estimate income of Poles working abroad and foreigners working in Poland as well as information derived from the Household Budget Survey. NBP has also been receiving, from the CSO, data required for updating register of entities engaged in the operations included in the balance of payments.

NBP receives, from the Ministry of Finance (MF), data on foreign transactions of the government sector. The MF also provides information that is used in compiling balance of

payments current account, i.e. the data on the import of used cars from the EU (data is not recorded by the CSO).

The Social Insurance Institution provides NBP with data on the number of foreigners, for whom social security and health premiums are paid as well as data on pensions paid abroad.

The Ministry of Labor and Social Policy provides NBP with data on the number of statements by employees willing to provide employment to foreigners as well as data on the number of employment permits issued – this data is used in estimating income from employment of foreigners in Poland and remittances.

NBP cooperates with international institutions such as the European Central Bank (ECB), Eurostat, International Monetary Fund (IMF), Organization for Economic Cooperation and Development (OECD), World Bank (WB), Bank for International Settlements (BIS) in the area of balance of payments methodology.

#### Users

Data on the b.o.p., the i.i.p., the external debt, the official reserve assets, the international reserves and foreign currency liquidity are available to users on the NBP's website.

Moreover, data and publications are forwarded to the Parliament, the Government, the CSO and to private and public research institutes, universities, rating agencies, etc. Analytical papers on bop are published on NBP website.

B.o.p., i.i.p. and direct investment statistics are transmitted to the ECB, the European Commission (Eurostat), the IMF, the OECD and the World Bank on regular basis.

#### 5.4.2.2. Statistical system

##### The data collection system

The Polish balance of payments compilation system is based on direct reporting of entities involved in transactions with non-residents to NBP. Reports encompass foreign financial assets and liabilities as well as income on those assets and liabilities. Information derived from public statistics surveys as well as administrative data sources is also used in calculating current account.

In order to reduce the reporting burden for reporting agents while aiming at keeping data quality, reporting thresholds for data received from enterprises have been introduced.

Data on transactions is cross checked with the information on stocks. Other data sources such as: central registry of Treasury bonds, data on privatisation, internet sources and press articles are also used to assess the plausibility of data.

## Reporting agents

Financial and non-financial corporations are required to report information on the financial account of the balance of payments and income on them directly to NBP.

Data on foreign transactions of the Ministry of Finance is provided by financial agents to the government (i.e. Bank Gospodarstwa Krajowego and Narodowy Bank Polski). Substantial portion of data on the current account is collected and published by external institutions (CSO –data on goods, services and – since 2013 – data on international travel).

## Reporting thresholds

Entities of public finance sector with total assets, liabilities and equity at year-end equal or over PLN 500 million report to NBP on monthly basis, and entities of public finance sector with total assets, liabilities and equity at year-end equal to PLN 26 million and below PLN 500 million report to NBP on quarterly basis.

Natural persons whose receivables and liabilities unrelated to their business activity at year-end are equal to or above PLN 7 million report to NBP on quarterly basis.

Other residents (excluding public finance sector entities, natural persons, investment entities which keep securities accounts and banks) whose total amount of assets, liabilities and equity capital at year-end is either equal to or greater than PLN 300 million report to NBP on monthly basis and residents whose total amount of assets, liabilities and equity capital at year-end is higher than PLN 10 million and lower than PLN 300 million report to NBP on quarterly basis.

## Data availability

Monthly b.o.p. is published 44 working days following the end of a respective month. Quarterly b.o.p. is compiled and distributed three months following the end of the reference quarter. Detailed release calendar is available on NBP website.

Breakdowns in the monthly b.o.p. are limited in detail. The quarterly b.o.p. is available with detailed instrument/category and sectoral breakdowns.

Geographical breakdown is available since 2004.

Balance of payments, international investment position, external debt and foreign direct investment data is presented in three currencies: PLN, EUR and USD.

## Data checks

At the individual level data is automatically checked during the transmission when uploaded to the database.

The data is also checked at an aggregated level through analysis of time series for each component.

Flows are reconciled with relevant stocks.

Moreover, the data is cross-checked with other sources, e.g. information on relevant stocks from b.o.p and monetary statistics, database of T-bonds central register, securities databases, internet, press, data on privatisations, etc.

#### 5.4.2.3. Revision policy

Monthly b.o.p. data:

- first revision when the data of the following month become available;
- next revision when data of the relevant quarter is revised or published;

The quarterly b.o.p. data is routinely revised:

- first revision when data of the following quarter become available,
- next revision on end-March and end-September, and further revision when data referring to corresponding annual i.i.p. becomes available.

#### 5.4.2.4. Publication

The data on b.o.p., i.i.p., the external debt, the official reserve assets, the international reserves and foreign currency liquidity is available to users on NBP's website. Release calendars are also posted on the website.

More detailed data on the b.o.p., i.i.p., external debt, reserve assets, direct investment and relevant analyses are published by NBP:

- Bilans płatniczy Rzeczypospolitej Polskiej (Balance of Payments of the Republic of Poland) – on quarterly basis;
- Polskie i zagraniczne inwestycje bezpośrednie (Direct Investment) – on annual basis;
- Międzynarodowa pozycja inwestycyjna Polski (International Investment Position in Poland) – on annual basis.

Moreover, the below NBP publications also comprise the b.o.p. data:

- Biuletyn informacyjny (“Information Bulletin”) – on a monthly basis;
- Raport Roczny (“NBP’s Annual Report”) – on an annual basis.

#### 5.4.2.5. Balance of payments<sup>7</sup>

##### Definition

The balance of payments is a statistical statements that summarizes economic transactions between Poland and all other countries (i.e., between Polish residents and non-residents)

---

<sup>7</sup> The international standards for compiling the balance of payments were defined in the following publications: *Balance of payments and International Investment Position Manual*, 6th edition, 2009, International Monetary Fund, *OECD Benchmark Definition of Foreign Direct Investment*, fourth edition 2008, OECD, *External Debt Statistics 2014*, International Monetary Fund, *International Reserves and Foreign Currency Liquidity 2014*, International Monetary Fund, *System of National Accounts*, 2008, Inter-Secretariat Working Group on National Accounts, *European System of Accounts ESA 2010*, Eurostat, 2013.

in a defined period of time. The balance of payments incorporates the current account, the capital account, the financial account as well as errors and omissions.

#### 5.4.2.5.1. The current account

##### Definition

The current account comprises transactions in goods, services, primary income and secondary income.

##### 5.4.2.5.1.1. Goods

##### Definition

Trade in goods item of the balance of payments includes the value of exchange of goods with foreign countries which comprises transactions between residents and non-residents, including but not limited to:

- transactions leading to the change in ownership of goods; these are mainly purchase/sale transactions, however the change in ownership of goods may also result from free-of-charge transfer (donations, aid in-kind), as well as from the in-kind contributions by foreign investors or from of financial lease of goods (such as means of transport, machinery and equipment),
- Merchanting is defined as the purchase of goods by a resident from a non-resident combined with the resale of the same goods to another non-resident without the goods being present in Polish economy. Merchanting is shown on the side of exports (purchase of goods shown as negative exports and sale of goods is shown as positive exports);
- transaction for the purchase or sale of non-monetary gold.

Trade in goods does not include purchase/sale transactions of monetary gold carried out between central banks as well as transactions involving goods for processing and repairs; Goods are only temporarily transferred for processing, in light of the bop methodology, there is no resident-non-resident exchange of goods and therefore such transaction is not shown in trade in goods.

##### Specific features of data collection

The main source of data on goods in the Polish balance of payments is Foreign Trade Statistics (FTS) compiled by the Central Statistical Office (CSO) on the basis of INTRASTAT declarations (for intra-European Union trade) as well as from the Single Administrative Documents, SAD (for extra EU trade); this data is published by the CSO under the foreign trade item.

Due to the fact that the international methodological standards are nearly the same in case of compilation of trade in goods with foreign countries for the balance of payments and for the national accounts purposes, NBP and the CSO agreed on the principles of transition from the foreign trade data in the FTS into the trade in goods data in the balance of payments

and national accounts. In order to obtain the relevant data, the following adjustments must be made:

- decrease in the value of foreign trade data on the import side by the value of costs of transport included in the invoices drawn upon the CIF basis;
- decrease in the value of foreign trade data by transactions in goods for processing;
- reclassification of merchanting
- additional estimation of the trade in goods.

Decrease in the value of foreign trade data by transactions in goods for processing and repair is made by removing total transactions in goods for processing and repair from trade in goods. These goods are identified by transaction type.

#### Reclassification of merchanting:

Merchanting is defined as the purchase of goods by a resident from a non-resident combined with the resale of the same goods to another non-resident without the goods being present in Polish economy. Data on merchanting is derived from services statistics. Revenues on merchanting are reclassified as exports and expenditure on merchanting are reclassified as negative exports.

Additional estimation of the trade in goods with foreign countries, made for the balance of payments and for national accounts relates to the turnover which was not registered in the FTS. It includes the following three groups of goods:

- 1) goods transported by tourists (in tourist traffic), which were purchased for resale;
- 2) other goods transported across the border without either the INTRASTAT declarations or the SAD documents being filled in (these include mainly the exported goods transferred abroad in bigger quantities without either the INTRASTAT declarations or the SAD documents, such as vegetables, fruit, furniture, footwear, clothing),
- 3) foreign trade data is increased by the value of imports of second-hand cars from European Union, which is not included in INTRASTAT system due to the low reporting thresholds for imports of cars. This data is obtained from Ministry of Finance which collects it for fiscal purposes.

#### 5.4.2.5.1.2. Services

##### Definition

Transport services include the services related to transport of goods, transport of passengers and other services connected with the abovementioned transport services, e.g. loading and unloading of containers, storage and warehousing, packaging and repackaging, towing and traffic control, maintenance and cleaning of equipment, rescue operations as well as postal and courier services (according to new standards it has been reclassified from other services).

The trade in services concerning travel apply to non-residents' expenditure in Poland and the expenditure of Poles abroad due to travel. This category includes expenditure on

accommodation, catering and services as well as goods purchased by tourists for their own needs (whereas the objects purchased for resale are classified as goods). Subject to type of travel, the expenditures are classified as business travel (including these of the seasonal and cross-border employees and other business travels) and personal travels (health, study and other)

Manufacturing services on physical inputs owned by others and maintenance and repair services have been reclassified from trade in goods to services. Manufacturing services on physical inputs owned by others cover processing, assembly, labelling, packing, and so forth. These actions result in significant changes in physical inputs made by an entity that does not own the goods. Maintenance and repair services cover both minor repairs that maintain the good in working order and major repairs that extend the efficiency and capacity of the good and extend its life. According to BPM5 methodology goods for processing and repair in goods have been presented in the balance of payments on gross basis i.e. goods sent abroad for/after processing (repair) were recorded on the side of exports and goods received from abroad for/after processing (repair) were recorded on the side of imports. Now, in line with BPM 6, the data will be recorded on net basis.

In addition to the transport services and foreign travel, there is a third type of services – other services. This category includes a number of transactions related to:

- construction,
- insurance,
- finance,
- telecommunication, information and IT technology,
- patent fees, royalties and licence fees,
- other business services (e.g. merchanting and other trade-related services, operational lease and other business services),
- cultural, and recreational services,
- government services.

Revenues include the value of services rendered by residents to non-residents, whereas the expenditures include the value of services rendered by non-residents to residents. On the other hand, in accordance with the international standards, certain services are presented in the balance of payments in a special way. Therefore, construction services are divided into services rendered abroad (the expenditures include the costs of those services incurred by residents) and the ones performed at home (the revenues include the costs of services incurred by non-residents). BPM6 methodology outlines new method for calculating insurance services. The total value of insurance and pension services is based on gross premiums earned and claims payable. Furthermore, total value of insurance services is expanded by income on insurance technical reserves. New methodology of calculating the

value of insurance services is linked to components of primary income, secondary income, financial account as well as technical insurance reserves included in the i.i.p.

Additionally, financial intermediation services indirectly measured (FISIM) have been added to financial services.

Merchanting services have been removed from other services and included in trade in goods.

#### Specific features of data collection

The data on trade in services both transport services, manufacturing services on physical outputs owned by others, maintenance and repair services and other services is collected by the Central Statistical Office directly from enterprises rendering and acquiring such services. The data is collected on a quarterly and annual basis and is broken down by required component type and country.

Furthermore, the value of services related to transport of goods is increased by the value of services resulting from the reclassification of a given part of the value of goods. This refers to the necessity of considering the fob-based value of goods in the balance of payments. In the FTS, only the value of export is expressed on the fob basis, whereas the value of imported goods is shown on the cif basis. Thus the decrease in the value of goods and the reclassification of the costs of transport and insurance services to a relevant category of services are required. Some values are estimated. The estimates include:

- transfer from the cif base to the fob base in the area of import of goods included in FTS,
- share of the transport costs in the payment for the export of goods executed by Polish carriers,
- share of individual types of costs (according to the means of transport) in the abovementioned estimated values.

The value of exports of services related to transport of goods is also increased by the costs of transport rendered by Polish carriers and included in the invoices of trade in goods.

Source of data for the compilation of travel in the balance of payments is the data of Institute of Tourism, which carried out surveys on travel until 2013, since 2014 data on travel are collected by the CSO.

Source of data for the compilation of insurance services, besides ITS survey carried out by CSO, is data received from Financial Supervision Authority.

#### Deviations from the international standards

In the procedure of increasing the value of transport services by the adjustments of trade in goods resulting from the transfer from the cif base to the fob base all corrected amounts are classified as transport services, while insurance services are not separated.

#### 5.4.2.5.1.3. Primary income

##### Specific features of data collection and definitions

###### Compensation of employees

Compensation of employees comprise foreign transfers related to payment for work performed by non-residents employed in Poland and Poles employed abroad i.e. persons who have been working abroad for less than one year.

Compensation of employees is calculated with the use of a estimation method. This method rests to a great extent on determining the number of Poles working abroad, period of their employment as well as the level of their compensation and their willingness to transfer their money to Poland. Major data source for estimating the number of Poles working abroad is the CSO data on migration, data derived from LFS (household survey carried out by Polish Central Statistics Office) as well as data from those countries in which Poles have found employment. Remaining elements of the new estimation method have been derived, to a great extent, from NBP survey carried out in selected European countries since 2007. The estimation methods for expenses and revenues are similar. The number of non-residents employed in Poland is estimated based on data derived from Ministry of Labor and Social Policy on number of work permits issued and on the data from the Social Insurance Institution (ZUS) on non-residents for whom payments on account of labour are made.

The same sources of data is used for estimates of workers' remittances included under current transfers of other sectors in balance of payments both for revenues and expenses.

###### Direct investment income

Income on direct investment comprises both income on equity capital and income on debt. The income on equity comprises dividends attributable to a direct investor and declared for a given reporting year (as regards public companies), share in profit (as regards limited liability companies), transferred profits of branches and reinvested earnings (loss per direct investor is deemed negative reinvested earnings). The income on debt, on the other hand, is included in the balance of accrued interest on loans extended and obtained by direct investors.

Earnings are calculated in accordance with COPC (Current Operating Performance Concept) aligned with Polish accounting standards. Monthly and quarterly bop is estimated based on financial result of banks as well as aggregated data on financial result of companies received from the CSO. Data derived from entities' annual reports, prepared in accordance with COPC, are subsequently broken down by respective quarters and months.

Source of data for direct investment are monthly and quarterly reports received directly from reporting agents (equity and debt instruments) and annual direct investment survey (only equity). Foreign direct investment in Polish entities listed on Warsaw Stock Exchange are compiled on security-by-security basis from financial statements of issuers and monthly reports provided by custodian banks and brokerage houses.

Data on interest are presented on accrual basis. Data on dividends are based on date on which dividends were declared (for non-listed companies) and by date on which dividends were settled (for listed companies).

Reinvested earnings and undistributed earnings are allocated to their period of origin. Reinvested earnings are earnings received in a given period minus dividends. Resident to non-resident relationship (direct investment) is defined in accordance with the Framework of Direct Investment Relationship (FDIR).

In case of securities with the ISIN code data on portfolio investment income in the balance of payments is calculated on the accrual “security-by-security” basis. The source of data for these calculations is security-by-security reports collected directly from Polish securities holders, issuers and financial institutions (securities trading intermediaries) and data on characteristics of securities derived from the database maintained by Narodowy Bank Polski. This database is supplied with data derived from the National Depository for Securities, Centralised Securities Database (CSDB) maintained by the ECB and data reported by Polish issuers. The only exception from the above mentioned rule are shares issued by non-residents, where due to limited availability of data (only data from CSDB), the dividends are registered at the date of payment and not at the “dividend day”.

In case of securities bearing no ISIN code data on income is reported directly by reporting entities on accrual basis. Securities are broken down by security type (equity securities, long-term debt instruments, money market instruments) and by sector of resident paying or receiving the revenue (general government, banks, other sectors). Income on debt securities bearing no ISIN code issued by Polish entities on external markets is neither collected nor estimated.

#### Portfolio investment income

In case of securities with the ISIN code data on portfolio investment income in the balance of payments is calculated on the accrual “security-by-security” basis. The source of data for these calculations is security-by-security reports collected directly from Polish securities holders, issuers and financial institutions (securities trading intermediaries) and data on characteristics of securities derived from the database maintained by Narodowy Bank Polski. This database is supplied with data derived from the National Depository for Securities, Centralised Securities Database maintained by the ECB and data reported by Polish issuers.

In case of securities bearing no ISIN code data on income is reported directly by reporting entities on memorial basis. Securities are broken down by security type (equity securities, long-term debt instruments, money market instruments) and by sector of resident paying or receiving the revenue (general government, banks, other sectors). Income on debt securities bearing no ISIN code issued by Polish entities on external markets is neither collected nor estimated.

As regards income on equity securities, only dividends are registered in the income category. All other incomes or losses on equity securities (especially income or loss resulting from the difference in purchase price and sale price of the security) are registered on the financial account of the balance of payments, in the „portfolio investment” category.

### Other investment income

Other investment income is registered on accrual basis. It comprises income on financial instruments which are regarded as other investments of the financial account and income on reserve assets. Income received by holders of insurance policies is also allocated to this category. Income on other investment of the financial account comprises: interest on loans extended and received, interest on deposits including interest on repos, and other payments related to income on property. Data on income on reserves assets include income on debt securities, interest on deposits and interest on repos. FISIM services have been excluded from pure interest. Insurance premiums include returns on investment of insurance technical reserves owned de facto by policy holders.

### Other primary income:

Other primary income consists of taxes and subsidies on products and production and rent. Taxes and subsidies on products and production have been present in bop since Poland's accession to the EU. Subsidies on products and production (Common Agricultural Policy) are shown in revenues while the portion of Polish premiums paid to EU which originate from Traditional Own Resources (TOR) are shown in expenditures. Rent refers to leases of natural resources.

#### 5.4.2.5.1.4. Secondary income

##### Definition

The secondary income account shows current transfers between residents and nonresidents. Current transfers such as donations, free-of-charge exports and imports of goods and services under international aid schemes, are recorded in this account to show their role in the process of income distribution between the economies. Transfers are executed, both in cash and in kind, in favour of government institutions or other sectors (private).

Funds received or paid by the Polish government sector that is central government and local government units constitute secondary income of government sector. These are the funds received from European Union institutions, countries and international organisations as well as paid in favour of these institutions and countries to finance current expenditures of the government – such as humanitarian aid, medicines, training, etc. These include also membership fees for the EU and international organisations outside the EU. The category includes also taxes and payments made by non-residents in favour of Polish government sector. Revenues from obligatory social insurance as well as retirement and annuity benefits paid by the Social Insurance Institution (ZUS) in favour of non-residents, and indemnities paid by the government vis-à-vis non-residents constitute other government transfers.

Secondary income of other sectors is split into personal transfers and other transfers.

Personal transfers consist of all current transfers in cash or in kind made or received by resident households to or from nonresident households. Workers' remittances is the key component to personal transfers.

Workers' remittances comprise transfers of wages and salaries of persons working abroad and considered to be residents of the country in which they work. In compliance with the IMF recommendations, a person staying or intending to stay for a year or longer on the territory of a given country is a resident of that country. In such case, funds transferred in favour of the person's family are registered in current transfers as workers remittances. On the other hand, in case of the stay lasting shorter than a year, the person is treated as non-resident and his/her income is registered in the balance of payments under income as compensation of employees.

Other transfers of non-government sector include the value of current transfers abroad of residents – natural persons and other entities of national economy not included in the government sector. The other transfers of non-government sector made in kind (free-of-charge transfers of goods and services in foreign trade) and/or in cash include:

- donations and aid received from abroad, as well as rendered in favour of non-residents, related to execution of objectives not connected with investment (e.g. humanitarian aid, food, clothing, medicines, training),
- taxes and fees in favour of foreign governments,
- membership fees,
- retirement and annuity benefits received by residents from abroad,
- inheritance,
- alimony,
- fines and indemnity (e.g. related to breach of contracts, product forgery, forgery of trademarks, patents),
- competition and lottery winnings,
- fees for transfer of sportsmen,
- net non-life insurance premiums,
- non-life insurance claims.

#### Specific features of data collection

The source for government transfers category in the balance of payments is the regional branch of Narodowy Bank Polski which keeps settlements of banking accounts of Ministry of Finance that are used for government transfers (both regarding UE and the other international organisations). The data on other transfers such as retirement and annuity benefits paid by Polish government is derived directly from the Social Insurance Institution (ZUS) which is in charge of such transfers.

The source used for compilation of workers' remittances has been described in the chapter on compensation of employees.

Data on transfers of other sectors is compiled based on numerous data sources. Data on transfers of enterprises is collected in the frame of survey on international trade in services carried out by the CSO. The other transfers of other sectors on revenue side are mainly based on LFS (household survey made by Polish Central Statistics Office); information from Ministry of Finance and the Social Insurance Institution (ZUS) is used as additional sources.

Both net non-life insurance premiums and non-life insurance claims are derived from estimations of insurance services.

#### 5.4.2.5.2. Capital account

##### Definition

The basic components of the capital account in the balance of payments are capital transfers representing transfers of rights to tangible assets, i.e. donations and funds included in non-returnable grants, specially assigned to fixed assets financing, debt write-offs by the creditor, transfer of funds related to the acquisition or disposal of nonfinancial and non-produced assets. Capital transfers are compiled separately for the government sector and other sectors.

**Capital transfers of the government sector** reflect the value of funds received from EU institutions, countries and international organisations, as well as funds transferred by the Polish government in favour of these institutions. Funds in cash are allocated free-of-charge to financing investment in fixed assets e.g. construction of roads, motorways, bridges, schools, hospitals, etc. The category of capital transfers of the government sector comprises write-offs of receivables, both principal and interest.

**Capital transfers of other sectors** comprise donations and grants specially assigned to fixed assets financing, which were received from or transferred abroad by nongovernment units.

**Acquisition and disposal of non-produced nonfinancial assets** comprises purchase and sale of patents, copyrights, licenses and trademarks, purchase and sale of land to foreign embassies located in Poland as well as purchase and sale of land by Polish embassies abroad.

##### Specific features of data collection

**Capital transfers of government sector** are compiled in the balance of payments on the base of data derived directly from the banking accounts of the Ministry of Finance.

**Capital transfers of other sectors** are calculated based on data collected under the survey on international trade in services carried out by the CSO which, apart from the data on turnover of services, collects information on current transfers and capital transfers.

#### 5.4.2.5.3. Financial account

##### Definition

**The financial account** comprises financial transactions involving direct investment, portfolio investment, other investment, financial derivatives and reserve assets.

#### 5.4.2.5.3.1. Direct investment

##### Definition

NBP compiles data on direct investment in compliance with the OECD definition. The term „direct investment abroad” denotes an investment made by a resident entity in one economy (“direct investor”) in an entity resident in an economy other than that of the investor („direct

investment enterprise") aimed at attaining a long-term profit from the capital involved. The direct investment enterprise denotes an enterprise in which direct investor owns at least 10% of the voting power in the decision making body of the company.

The direct investment capital comprises equity capital in the form of shares and other equity, reinvestment of earnings and assets and liabilities vis-à-vis debt instruments.

Reinvestment of earnings denote the part of profits, accruing to a direct investor, which remains in the direct investment enterprise and which is allocated to its further development.

#### **Specific features of data collection**

Source of data for direct investment are monthly and quarterly reports received directly from reporting agents (equity and debt instruments) and annual direct investment survey (only equity). Foreign direct investment in Polish entities listed on Warsaw Stock Exchange are compiled on a security-by-security basis from financial statements of issuers and monthly reports provided by custodian banks and brokerage houses.

Business entities register is revised and updated with the use of information from other sources such as press information, financial statements of business entities, bilateral contacts etc.

Assets and liabilities of investment funds are not included in direct investment.

Sources of data on securities comprise, stocks and flows, security-by-security reports provided by Polish investors (assets) or issuers/brokers (liabilities).

In case of securities with the ISIN code the source of data for these data is data on characteristics of securities (price, coupon or corporate action) derived from the database maintained by Narodowy Bank Polski. This database is supplied with data derived from the National Depository for Securities, Centralised Securities Database maintained by the ECB and data reported by Polish issuers. Valuation adjustments and exchange rate fluctuations are calculated by NBP on a security-by-security basis. Data for this calculation is derived from securities database.

In case of securities without the ISIN code data on stocks (market value) and transactions are derived from received reports. Reports also encompass data on valuation adjustments, exchange rate fluctuations and other changes.

Issuers reports are data source for securities not bearing the ISIN code issued by Polish issuers on external markets. Value of interest paid is estimated on an individual basis.

#### **5.4.2.5.3.2. Portfolio investment**

##### **Definition**

Portfolio investment is defined as cross-border transactions and positions involving debt or equity securities, other than those included in direct investment or reserve assets.

Equity securities comprise all kinds of tradable shares and stocks, including investment certificates (shares) of collective investment funds. These comprise also participation units in collective investment funds, investment certificates and depository receipts (e.g. ADR or GDR).

Debt securities comprise all kinds of long-term and short-term debt securities including government bonds, corporate bonds, T-bills, short-term corporate debt securities and negotiable certificates of deposit. Debt securities are classified as long-term securities or money market (short-term) instruments based on their original maturities. Long-term debt securities are securities with original maturity of at least one year. All other debt securities are classified as money market instruments (short-term debt securities). Debt securities category comprises also debt securities with embedded financial derivatives (e.g. convertible bonds or callable/putable bonds).

Other financial derivatives are excluded from portfolio investment and are registered under “Financial derivatives”. Repo transactions are also excluded from the portfolio investment category and registered in „Other investment” category.

#### Specific features of data collection

The source of data on portfolio investments item in the balance of payments are “security-by-security” reports on positions and transactions collected directly from Polish holders of securities (in case of portfolio assets), issuers and intermediaries in trading in securities (in case of portfolio liabilities).

In case of securities bearing the ISIN code, the data used in the process of verification and compilation of reporting data is the data on characteristics of securities e.g. coupons, prices, corporate events derived from the database kept by Narodowy Bank Polski. This database is supplied with data derived from the National Depository for Securities, Centralised Securities Database (maintained by ECB) and data derived directly from Polish issuers. Data on transactions is adjusted on security-by-security basis against repo transactions. Market value of transactions (including interest accrued and paid) is calculated on a security-by-security basis.

In case of debt securities with the ISIN code issued by Polish entities on external markets residual approach applies. The data from the issuers is modified in the process of compilation with the use of the data on transactions executed by Polish holders of these securities. The security-by-security calculations include the value of interest (accrued and paid).

In case of securities without the ISIN code data on stocks (market value) and transactions are derived from received reports. Reports also encompass data on valuation adjustments, exchange rate fluctuations and other changes. Reports of issuers serve as a source of data on securities without ISIN codes issued by Polish entities on external market.

Securities are broken down by sector or resident-issuer of securities (for liabilities), sector of resident-holder of securities (for assets) as well as by country of issuer for portfolio assets.

#### 5.4.2.5.3.3. Other investment

##### Definition

Other investment is a residual category that includes positions and transactions other than those included in direct investment, portfolio investment, and reserve assets. Other investment covers: other equity, currency and deposits, loans, insurance technical reserves, trade credits and advances, other assets and liabilities and special drawing rights. Other investment (with the exception of trade credits) is presented on accrual basis i.e. recording interest accrued and unpaid.

##### Other equity

Equity not in the form of securities and participation in some international organizations is classified as other equity.

##### Currency and deposits

On the assets side the currency and deposits are calculated on the base of stocks of claims on cash in the form of foreign currency (only the banking sector), current accounts and deposits in credit institutions and in foreign banks. This category comprises: currency accounts and deposits (including overnight deposits), term deposits, deposits redeemable at notice, blocked deposit accounts and repo transactions.

On the liabilities side the currency and deposits are calculated on the base of stocks of liabilities on current accounts and deposits held by non-residents. This category comprises: current accounts and deposits (including overnight deposits), term deposits, deposits redeemable at notice, blocked deposit accounts and repo transactions. The currency and deposits cover also liabilities on money security excluding initial margin for derivatives.

##### Loans

Extended and received loans, apart from the breakdown into long-term (with original maturity exceeding one year) and short-term (with original maturity up to one year), are broken down by sectors of economy. Turnover comprises not only drawings and repayments in cash but also drawings and repayments in the form of goods and services delivery, rollover, interest capitalization, conversion to Polish złoty, credit restructuring, loan on current account and overdrafts on accounts held with credit institutions, foreign banks or entities providing financial services for capital group.

##### Insurance technical reserves

Insurance technical reserves are estimated for the insurance services purposes.

##### Trade credits and advances

Trade credits are estimated based on stocks of assets and liabilities related to advances extended, payments deferred in imports and exports of goods and services and prepayment by customers for goods and services not yet provided.

## Other assets and liabilities

Other financial assets and claims on non-residents comprises among others assets which result from difference of the time of transaction and the time of corresponding payment e.g. claims on the share in profit or dividend declared but not yet paid or converted into another financial instrument; funds deposited on current accounts in other intuitions i.e. other than foreign banks and credit institutions; claims on returnable variation margins (initial margin) for derivatives. The item other liabilities to non-residents covers among others liabilities which result from transactions implying difference of the time between the transaction and the time of corresponding payment (e.g. dividend declared but not yet paid or converted into another financial instrument) and liabilities on returnable variation margins (initial margin) for derivatives.

### Special drawing rights (SDR)

Transactions on SDR allocation are included in this position.

### Method of data collection

Since 2010 data on other investment, both Polish investment abroad and foreign investment in Poland have been compiled on the basis of reports directly supplied by Polish reporting entities.

#### 5.4.2.5.3.4. Financial derivatives

##### Definition

The “Financial derivatives” constitute the separate category of the balance of payments. It comprises all derivatives with symmetrical risk such as futures, forwards, swaps, IRS, CIRS, CDS as well as instruments with unsymmetrical risk such as options. This item includes both derivatives settled by delivery of basic instrument and derivatives settled in cash. The profit or loss on transactions involving financial derivatives is classified into this category.

The data on financial derivatives are also available in geographical breakdown. The criterion of a first identified contractor is used to determine national status of the parties of transaction. The breakdowns by the type of a basic instrument (foreign exchange rates, interest rate, commodity, shares, credit derivatives, others) and by pairs of currencies (in case of foreign exchange instruments) or by settlement currency (for other types of derivatives) are available.

##### Specific features of data collection

The source of data on financial derivatives for the balance of payments is reports collected directly from Polish entities having positions which emerged as a result of transactions on derivatives with non-residents.

Financial derivatives cover all financial flows resulting from settlements of transactions involving financial derivatives, except returnable initial margins. In the discussed category variation margins and option premiums are registered. Data is registered on gross basis.

#### 5.4.2.5.3.5. Reserve assets

##### Definition

Reserve assets cover transactions with non-residents related to: monetary gold, reserve position in the IMF and other reserve assets, in convertible currencies.

Reserve assets comprises balance of transactions carried out by NBP with respect to instruments included in reserve assets, (including the balance of turnover on currency and deposits accounts in banks abroad, balance of transactions executed in foreign currencies in NBP counters, balance of turnover of foreign securities, balance of reverse repos, change in reserve position in the IMF as well as purchase and sale of monetary gold).

##### Specific features of data collection

Data on reserve assets are collected based on accounting system of NBP.

#### 5.4.2.6. International Investment Position

##### Definition

The international investment position is a statistical statement of the stock of foreign assets and liabilities at the end of the reporting period. Net international investment position informs whether a country is a creditor or a net debtor.

Changes of stock of foreign assets and liabilities is driven by the value of transactions with nonresidents as well as exchange rate changes, differences from valuation of assets and liabilities and other changes.

##### Specific features of data collection

The international investment position is compiled based on data from:

- Narodowy Bank Polski,
- the Ministry of Finance,
- financial agents of government (NBP and Bank Gospodarstwa Krajowego),
- the National Depository for Securities,
- Polish banks conducting settlements with non-residents,
- Polish companies participating in trade abroad.

Foreign assets and liabilities is presented broken down into types of financial instruments and the sectors of the national economy.

#### 5.4.2.6.1. Direct investment

##### Definition

NBP compiles data on direct investment in compliance with the OECD definition. The term „direct investment abroad” denotes an investment made by a resident entity in one economy (“direct investor”) in an entity resident in an economy other than that of the investor („direct investment enterprise”) aimed at attaining a long-term profit from the capital involved.

Foreign claims against direct investment comprise resident’s shares in foreign capital-linked companies. Foreign claims against direct investment also include claims against debt instruments owned (loans extended by residents to foreign capital-linked companies), claims on provision of goods and services and prepayments to foreign investors against future supply of goods and services and other debt instruments owned by capital-linked companies.

Claims against foreign investment comprise residents’ equity claims against debt instruments owned (loans received by non-residents), claims on provision of goods and services, prepayments to foreign investors against future supply of goods and services and other debt instruments owned by capital-linked companies.

##### Specific features of data collection

Foreign assets and liabilities vis-à-vis direct investment have been calculated based on reports of residents that are part of capital-linked groups.

#### 5.4.2.6.2. Portfolio investment

##### Definition

Portfolio investment is defined as transactions and positions involving debt or equity securities, other than those included in direct investment or reserve assets.

##### Specific features of data collection

The source of data are security-by-security reports on stocks and flows collected directly from Polish holders (in case of portfolio assets), or Polish issuers and financial intermediaries (in case of portfolio liabilities).

For securities bearing an ISIN code, descriptive data, e.g. prices, coupons, corporate events from the securities database, maintained by NBP, are used in the verification and compilation of reported data. This database is supplied with data derived from the National Depository for Securities, Centralised Securities Database maintained by the ECB and data reported by Polish issuers. For securities without ISIN codes issued by Polish entities on foreign markets, the issuer data is used.

Data on securities issued by Polish residents on domestic market and held by non-residents is derived from reports of securities intermediaries on domestic market. Custodian banks, brokerage offices/houses, central depository institutions and clearing houses (KDPW) are

sources of data. Sources of data for non-resident portfolio of securities issued by the State Treasury on the domestic market are KDPW (Treasury bonds) and NBP (Treasury bills). For securities issued by the State Treasury on external markets the issuer data is used. Residual approach applies in case of securities issued by residents on external markets. Data received from the abovementioned entities are revised (decreased) against reports of Polish holdings of securities issued by residents on external markets.

Data on portfolio assets of Polish government (securities issued by non-residents) are derived from the bank that provides banking services to Polish government. In case of portfolio assets held by other domestic entities data is derived from reports of individual investors.

Portfolio assets and liabilities are subject to market-price valuation.

In order to differentiate between external liabilities in direct investment and external liabilities in portfolio investment an estimation of equity securities issued by Polish banks and non-financial corporations, held by foreign direct investors on accounts with Polish banks and brokerage offices/houses is made. The estimation is based on data on significant investors in Polish public companies, which is derived from obligatory reports of public companies. Direct investor is an investor with at least 10% of voting shares. Portfolio and direct investment – on the side of external assets – are separated by reporting entities (Polish investors) holding equity securities issued by non-residents.

For portfolio investment, securities with ISIN codes issued by Polish entities on foreign markets. Market value (including accrued interest) is calculated on an s-b-s basis using the securities database.

For securities without ISIN codes, the data on the market value of stocks and transactions reported directly by reporting entities is used for compilation. The reports also, include the data on valuation changes, exchange rate changes and on other changes.

#### 5.4.2.6.3. Financial derivatives

##### Definition

A financial derivative is a financial instrument that is linked to another specific financial instrument or indicator or commodity (“underlying assets”) and through which specific financial risks (such as interest rate risk, foreign exchange risk, equity and commodity price risks, credit risk, and so on) can be traded in their own right in financial markets. Swaps, options, futures and warranties are all financial derivatives.

The financial derivatives category includes all symmetrical risk instruments, such as futures, forwards, swaps, IRS, CIRS, CDS and asymmetrical risk instruments, such as options. In terms of coverage, derivatives settled by underlying instrument delivery, as well as derivatives with cash settlement are included.

Assets include all derivatives with asymmetrical risk profile written by non-resident and purchased by resident and instruments with symmetrical risk profile which had positive market valuation as at the end of the reporting period. Liabilities cover all derivative

instruments with asymmetrical risk profile written by resident and purchased by non-resident and instruments with symmetrical risk profile which had negative market valuation as at the end of the reporting period.

#### **Specific features of data collection**

Data on i.i.p. derivatives stocks and flows are derived from reports received from reporting agents, which encompass data on valuation adjustments, exchange rate fluctuations and other changes

Data on financial derivatives are also available in geographical breakdown. The criterion of a first identified contractor is used to determine national status of the parties of transaction. The breakdowns by the type of a basic instrument (foreign exchange rates, interest rate, commodity, shares, credit derivatives, others) and by pairs of currencies (in case of foreign exchange instruments) or by settlement currency (for other types of derivatives) are available.

##### **5.4.2.6.4. Other investment**

###### **Definition**

Other investment – includes stocks of other assets and liabilities that are not included in direct investment, portfolio investment or in the reserve assets. Other investments include: other equity, trade credits and advances, other loans, currency and deposits, insurance technical reserves, SDRs (allocation) and other accounts receivable/payable.

###### **Other equity**

Other equity includes equity in a form other than securities, so it is not included in portfolio investment. This position covers mainly equity shares in international organizations.

###### **Trade credit and advances**

Stocks of assets and liabilities arising from trade credits and advances include the so-called company credits, i.e. stocks of receivables and payables goods and services and benefits paid or received advance payments for future deliveries.

Information on these credits come directly from the monthly and quarterly survey of exporters and importers which are providers or receivers of trade credits.

The information is based on the nominal value. The data refer mainly to “other sectors.”

###### **Other Loans**

Loans include the stocks of receivables and liabilities arising from drawn and outstanding foreign loans (excluding trade credits and loans included in FDI). Receivables from non-residents due to credit on the current account, the stock of overdrafts, the stocks of debt on exceeding balances in accounts held in credit institutions, foreign banks and entities providing financial services for capital group are included on the stock of loans.

Information on loans is broken down into long-term (with original maturity exceeding one year) and short-term (with original maturity of up to one year) broken down by the sectors of economy. The accruals principle applies.

Trade credits and advance are presented in separate item of foreign assets and liabilities.

Loans from/to foreign investors are shown as a component of direct investment – debt instruments.

#### Currency and deposits

This category of foreign assets and liabilities include:

- **on assets side:**
  - a) the stock of current (nostro) and timely accounts (deposit) in credit institutions and foreign banks;
  - b) receivables on repurchase agreement;
  - c) in the case of the banking sector further:
    - value of foreign currencies in cash desks;
    - receivables from cash collaterals;
- **on liabilities side:**
  - a) the stock of current (loro) and timely accounts (deposit) of credit institutions and foreign banks (non-residents);
  - b) the stock of current and timely accounts (deposit) of non-residents other than banks;
  - c) liabilities arising from repo transactions;
  - d) the stock of non-residents accounts in bank's brokerage houses;
  - e) liabilities from cash collateral (except initial margins for financial derivatives).

#### Other assets and liabilities

Other assets and liabilities cover data on assets and liabilities other than loans, debt securities, trade credit and advances, currency and deposits. To this item are recognized among other states receivables and payables, which include:

- on the assets side: e.g. receivables from share in profits or dividend which were declared but not paid out yet or not converted into some other financial instrument; funds deposited on current accounts with other institutions, i.e. other than foreign banks and credit institutions; receivables from repayable margin deposits (original deposits) for financial derivatives.
- on the liabilities side: e.g. dividends which were declared but not paid out yet or not converted into some other financial instrument); receivables from repayable margin deposits (original deposits) for financial derivatives.

### Insurance technical reserves

Financial assets of policy holders or beneficiaries and liabilities of insurers, pension funds, or issuers of standardized guarantees.

### Special drawing rights (SDR) allocations

This item covers the allocation of SDRs, with a corresponding entry under SDRs in reserve assets.

### Specific features of data collection

Information on the assets and liabilities from other investments come from:

- reports received directly from Polish entities;
- financial agents of the government (the NBP and Bank Gospodarstwa Krajowego),
- the accounting system of NBP.

## 6.5. Reserve assets

### Definition

Reserve assets are those external assets that are readily available to and controlled by Narodowy Bank Polski. These assets can be used for meeting balance of payments financing needs, for intervention in exchange markets to affect the currency exchange rate and for other activities of the monetary authorities (such as maintaining confidence in the currency and the economy).

Reserve assets comprise:

- monetary gold, valued on the balance sheet date at the average market price;
- special drawing rights (SDRs);
- reserve position in the International Monetary Fund;
- other reserve assets (cash, currency and deposits, reserve repo and securities issued by nonresidents in convertible currency), including:
  - currency and deposits held in foreign banks, valued on the balance sheet date on the accrual basis;
  - securities issued by foreign entities – quoted at the liquid market, valued on the balance-sheet day according to average market price;
  - receivables under reverse repo (purchase of securities under repurchase agreements)
    - valued according to the amount receivable on the balance-sheet day
  - foreign currencies held in NBP vaults – valued on the balance-sheet day according to nominal value;

## Specific features of data collection

Data on reserve assets are collected based on accounting system of NBP.

### 5.4.2.7. External debt

#### Definition

Narodowy Bank Polski reports information on Poland's external debt in accordance with the following definition: "Gross external debt, at any given time, is the outstanding amount of those actual current, and not contingent, liabilities that require payment(s) of principal and/or interest by the debtor at some point(s) in the future and that are owed to non-residents by residents of an economy".

The above definition refers to gross debt, i.e. it refers to the particular foreign liabilities of Poland (with no deduction of Polish assets abroad). The external debt obligations are taken into account only existing and unregulated (creditor must have a claim against the debtor). External debt covers the entire range of debt instruments, regardless of how they are constructed. Debts are usually carried out by providing economic value, ie. a financial or non-financial assets (including commodities) by the debtor to the creditor usually under a contract that specifies the terms and conditions of repayment.

The distinction between domestic and external (foreign) debt is based solely on the criterion of residence, regardless of the currency involved.

The following debt instrument have been included in the concept of external debt:

- currency and deposits held by non-residents at Polish banks;
- debt securities held by foreign portfolio investors;
- trade credits;
- other loans and credits (including financial leases);
- insurance technical reserves;
- other foreign liabilities;
- allocations of SDRs.

External debt includes:

- liabilities between residents and non-residents in both the domestic currency and foreign;
- securities issued in foreign markets and the domestic market, purchased by non-residents;
- financial leases with non-residents is treated as a loan and there is also disclosed.

Data on arrears are not separately presented.

Foreign debt does not include any financial liabilities arising from shares held by non-residents and other equity (mutual funds, private equity and reinvested earnings in the framework of direct investments and real estate) and derivative financial instruments.

From the point of view of original maturity of debt instruments they have been divided into:

- long-term (with the original maturity of over one year);
- short-term (with the original maturity of one year or less).

Foreign debt is presented broken down into:

- Government and local government;
- National Bank Polish;
- Monetary Financial Institutions (MFIs);
- Other sectors (financial and non-financial entities);
- Direct investment.

#### **Specific features of data collection**

Information on the liabilities arising from debt instruments are derived:

- with reports received directly from Polish entities;
- from the accounting system of NBP.
